Project Name	Implement Client Script & UI Policy (Incident)
Team Size	5

Team Details

Team Leader	DHIVYA DHARSHINI R
Team Member	DIVYALAKSHMI R
Team Member	GAYATHRI S
Team Member	GUNASUNDARI SIVAKUMAR
Team Member	HARINI M

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with their goals and challenges.

Empathy Map – Incident Management User

Think & Feel	Wants a simple and efficient incident form; wants required information to be clear; wants fewer unnecessary fields.
Hear	Receives instructions from support teams and users about incident handling and required details.
See	Sees incident forms with multiple fields, some of which may be unnecessary for a particular situation.
Say & Do	Creates, updates and resolves incidents; enters information and follows incident management procedures.
Pain	Confusion when fields are not dynamically controlled; extra data entry; difficulty identifying required fields.
Gain	Clear and guided forms, fewer unnecessary fields, improved accuracy, and faster incident handling.
