

Project Design Phase-II

Technology Stack (Architecture&Stack)

Date	01 October 2026
Team ID	SWTID-2026-8514
Project Name	Implement Client Script&UI Policy (Incident)
Maximum Marks	4 Marks

Team Details

Role	Name / Value
Team Size	5
Team Leader	DHIVA DHARSHINI R
Team Member	DIVYALAKSHMI R
Team Member	GAYATHRI S
Team Member	GUNASUNDARI SIVAKUMAR
Team Member	HARINI M

Technical Architecture:

The proposed solution uses the ServiceNow Incident form with Client Scripts and UI Policies to control field behavior, validate user input and improve the Incident form experience.

Layer / Component	Technology	Purpose
User Interface	ServiceNow Incident Form	Users create, view and update Incident records.
Client-side Logic	ServiceNow Client Script / JavaScript	Performs dynamic validation and controls form behavior.
UI Configuration	ServiceNow UI Policy	Controls field visibility, mandatory state and read-only state.
Application Platform	ServiceNow Platform	Hosts the Incident application and configurations.
Database	ServiceNow Platform Database	Stores Incident records and configuration data.
Security	ServiceNow Roles&ACLs	Provides role-based access and protects Incident information.

Table-1: Components&Technologies

S.No	Component	Description	Technology
1	User Interface	How users interact with the application.	ServiceNow Incident Form / UI
2	Application Logic-1	Logic for client-side processing in the application.	Client Script / JavaScript
3	Application Logic-2	Logic for controlling form fields based on conditions.	UI Policy
4	Application Logic-3	Additional server-side processing when required.	Business Rules / Script Includes

5	Database	Stores Incident data and configuration information.	ServiceNow Database
6	Cloud Database	Cloud-hosted data service used by the platform.	ServiceNow Cloud Database
7	File Storage	Storage for Incident attachments and related files.	ServiceNow Attachment Storage
8	External API-1	Optional external integration for Incident-related services.	REST API / IntegrationHub
9	External API-2	Optional integration with other enterprise applications.	REST / SOAP API
10	Machine Learning Model	Optional intelligent classification or prediction of Incidents.	ServiceNow Predictive Intelligence
11	Infrastructure (Server / Cloud)	Application deployment and cloud infrastructure.	ServiceNow Cloud Platform

Table-2: Application Characteristics

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	ServiceNow scripting uses JavaScript and platform-native configuration.	JavaScript / ServiceNow APIs
2	Security Implementations	Role-based access, ACLs, authentication and controlled administrative access.	ACLs, Roles, Authentication
3	Scalable Architecture	Cloud platform supports increasing Incident volume and concurrent users.	ServiceNow Cloud Platform
4	Availability	The solution is available whenever the ServiceNow platform is available.	ServiceNow Cloud
5	Performance	Client Scripts and UI Policies are kept lightweight to reduce form delays.	Optimized JavaScript / UI Policies
